

Nutritional Sciences and Toxicology

Spring 2015 Seminar Series

- Feb 4*** "Metabolic Stress Signaling by JNK"
Roger Davis, Ph.D. | Professor, Howard Hughes Medical Institute, UMASS Medical School
- Mar 4** "Lipid Metabolism in Immune Cell Function"
Ken Hsu, Ph.D. | Assistant Professor of Chemistry, University of Virginia
- Mar 11** "Innate Mechanisms of Metabolic Homeostasis"
Ajay Chawla, Ph.D. | Associate Professor, UCSF School of Medicine
- Mar 18** "Functional analysis of Fatty Acid-Binding Proteins in the intestine: What are they really doing?"
Judith Storch, Ph.D. | Professor (Distinguished), Co-Director of the Graduate Program, Rutgers University
- Mar 25** "The double edged sword of sphingolipids in colon carcinogenesis"
Julie Saba, M.D., Ph.D. | Pediatric Oncologist CHORI
- Apr 1** "Mechanisms of nutrient-induced mitochondrial stress in obesity and diabetes"
Deborah Muoio, Ph.D. | Associate Professor in Medicine and Pharmacology & Cancer Biology, Duke University
- Apr 8** "Protein quality control in stress management and metabolite sensing"
Randy Hampton, Ph.D. | Professor Cell and Developmental Biology, UCSD
- Apr 15** "Degrading activities: The regulation of cellular biology by ubiquitination (and acetylation)"
David Toczyski, Ph.D. | Professor, Comprehensive Cancer Center, UCSF
- Apr 29** "Role of the epigenome in pancreatic beta cell development, function and disease"
Maike Sander, M.D. | Professor and Director of Pediatric Diabetes Research Center at UCSD
- May 6** "New transcriptional regulators of non-shivering thermogenesis"
Jon Dempersmier | Ph.D. Candidate, UCB
- May 13** "Mapping Dysregulated Metabolic Pathways in Cancer using Functional Metabolomic Platforms"
Daniel Benjamin | Ph.D. Candidate, UCB

Seminars are Wednesday at 4:10pm in room 114 Morgan Hall

Refreshments are served at 3:45pm in 120 Morgan Hall

*unless otherwise noted
